Bringing data into useful information for others is the main thing that I learn in my study. I am a third-year undergraduate student from Institut Teknologi Sepuluh Nopember Surabaya majoring in Statistics. I can interpret and analyse data using data analytics tools that I am already familiar with such as Excel and R. Currently, I am expanding my knowledge by joining Bangkit Academy 2023 in Machine Learning path.

I'm also a person who loves to be active in both volunteering and student committee. I also had chances to be the person in charge of several student events. I believe that by being active in those activities, I can further enhance my soft skills such as communication skills and project management skills.

EDUCATION

Institut Teknologi Sepuluh Nopember | Surabaya

2020—Present

Bachelor's Degree – Statistics

GPA: 3.86/4.00

Expected Graduation: 2024

Asia University Taiwan

Aug 2022

Summer Program – Artificial Intelligence

A short 2-week summer program conducted via online by Department of Computer Science of Asia University for those who are interested in learning Artificial Intelligence

EXPERIENCES

Bangkit Academy 2023 by Google, GoTo, and Traveloka: Machine Learning Path

Feb 2023—Jul 2023

- Finished all Machine Learning Specialization Course in Coursera and managed to finish Capstone Project that are later selected to be the top 68 teams from 787 teams.
- Founder of CLASTIC: Classify Your Plastic, a sustainable living movement that help people to classify their plastic wastes and later distribute the wastes to recycling factory.
- As the person in charge of building the machine learning classifier of CLASTIC: Classify Your Plastic
